

SCIENCE - THE FOUNDATION OF OUR FUTURE

Khasanova Kamola

2nd year student in the field of Music Education

Faculty of Art History

Fergana State University

Abstract: This article discusses an opinion about the knowledge, attention paid to youth in our country, the new conditions and opportunities created for them. In addition, the articles provided information about reforms in science.

Key words: science, youth, conditions, convenience, law, privilege, person, sphere, specialist, education, upbringing, project, youth leader.

For many years I reflected on earthly life. There is nothing incomprehensible to me under the sun. I know that I know nothing - This is the last secret I have learned.

Omar Khayyam

It is known that knowledge is the most virtuous act because it is the key to the happiness of both worlds. This is why Islamic scholars have defined science as “knowledge is the perception of truth as it really is.” Human life cannot be imagined without science. The word knowledge is mentioned 811 times in the Holy Quran. Man is a man with the light of knowledge. If he does not illuminate his path with this light, he will remain on the street of darkness and ignorance¹. The human heart is more intelligent due to knowledge. The value of humanity is also created by knowledge. Beruni's opinion can be substantiated as follows: Art requires divine abilities, divine abilities manifest themselves after hard work. The path of knowledge is similar, as they say: “Getting knowledge is like digging a well with a needle!” They understand how difficult the task of knowledge is, how much it can be achieved through losses, laziness, selfishness; proud people emphasize that there will be no significant success in this regard.

Since knowledge is an incomparable treasure and inexhaustible wealth, today the President of our country has created excellent conditions and opportunities for young people. Therefore, young people pay special attention to their education and development. First of all, the legal framework for organizing work in this area is constantly being improved. In particular, the Law of the Republic of Uzbekistan “On the fundamentals of state policy towards youth” covers issues of legal and social protection of youth and support for their talents. The law regulates the powers of government bodies and other public relations in this area. It is also noteworthy that the right of youth to receive free education also deserves the attention of the Temurbek school, the modern education that is provided to youth in specialized schools is a solid foundation for the New Renaissance, as well as reforms and opportunities in the country. In the field of higher education, they are an important factor in the entry of young men and women into life as qualified specialists. In recent years, a number of regulatory documents have been developed in this regard, forming a new system of supporting and encouraging aspirations and talents. The good thing is that in the conditions of time and socio-economic changes, the demands and needs of modern youth are being studied and the doors of new privileges and opportunities are being opened. In particular, the allocation of loans in the amount of 4 trillion soums for young entrepreneurs in our country is a welcome situation. In addition, the prelude to supporting youth is the creation of 150,000 new projects and 325,000 new jobs. Of particular note are the

¹ From the book of hadiths about science.

initiatives of President Shavkat Mirziyoyev to improve youth policy in the new Uzbekistan based on the needs of the time. The constant attention of the head of our state to the development of youth is clearly visible, especially in educational reform. In particular, based on the experience gained in the IT park, at the end of the year a new creative park will be created in each region, which will use all the facilities and opportunities provided to IT residents. To achieve this goal, a new youth initiative fund of Uzbekistan and an electronic platform will be created, and the allocation of 100,000 US dollars to the fund will open a wide path for the younger generation to implement new start-up projects. The success of these reforms increases young people's trust in the state and laws.

A striking example of this is the issues of transferring students from foreign educational institutions to our universities, testing procedures, and testing knowledge simultaneously in 5 universities. Also provided are contracts for women and girls admitted to master's programs, expenses for obtaining certificates in a foreign language for 13 thousand young people, contract money for 53 thousand needy students, rental housing for 81 thousand students, funds for military service for 15.5 thousand young people. The payment provided by the state was an incentive for our youth to become more mature personnel. As the President noted: Considering that today our country is 55% young people:

- ensuring employment of youth in each district, providing them with quality education, vocational training and proper organization of free time.
- comprehensive support for young people in need of social assistance
- a new vertical management system has been created to develop common sense and worldview among young people and prevent their radicalization. In 9,400 districts, youth leaders have been selected from among our dedicated and enterprising boys and girls to lead the youth.

In a word, it is worth spending all your energy and knowledge on conquering new heights, studying science, taking advantage of the fact that the main attention in today's third period of the Renaissance is on youth. Because knowledge is the basis of our future.
