FEATURES OF THE FORMATION AND DEVELOPMENT OF PHOTOGRAPHIC KNOWLEDGE IN CENTRAL ASIA

Annotatsiya: Article had aroused great interests in the world community with the development of the art of photography revealed. This news also brought great opportunities to turkistan, land natejasida photographer who came to european scientists have had a number of scientific research, also began to grow in the form of initial local fotagraflar in turkistan. We are acknowledged but the large kerakka members who come to learn various knowledge of turkistan every tamonlama ekspedetsiya be conducted case studies of the local population had fatografik tayyangan natejasida representatives also gave the opportunity to enjoy this news.

Keywords: turkistan, photographers, Turkestan album, p. k. Kaufman, Photography, Russia, Sergey Prokudin Gorskiy, Local, discoveries.

Turkistan fotagrafil also be too large to spread knowledge to discuss the reason for that was that the warm attitude of the local population initially had representatives has expressed to the news. This news is so bad it's about to be the representatives of the muslim population produced at'zlar spread. But the camera and immediately had invented her "mo"of miracles" is an important source of studying the history of central asia. Be the first to photograph in the middle of the 19th century in this area has been used by simeon headed by p. p. ekspeditsiya. Many important and interesting historical information about the history of turkestan in central asia can be found in the photos album. Album turkestan turkestan general-governor in 1874, the year the command of general p. k. kaufman configured with the background and requirements for the collection of large photos is very organized."Turkestan album" - this is the album of photos and color photos. 1871-18 to 72 years in Turkestan general-governorship, according to instructions etnograf k. p. kaufman, a. l. orientalis Day (1840-1888) prepared by. "Turkestan album," on page 447, consists of photos and pictures including 1262.

This album crafts, archaeology and history is to be. "Turkestan album" at hand in the middle of the 19th century arts; types of agriculture, rituals and ceremonies, uzbekistan antropologik types of urban and rural life, landscapes and valleys of the city. The purpose of the local people provides many images shown as brutal and reactionary people. "Turkestan album" 7 copies will be prepared. A copy is stored in the national library of rare books section. The Russian photographer Sergey Prokudin central asian Country that initially the first color photograph of Gorskiy (1863-1944) was obtained by. Prokudin Sergey Gorskiy country landscapes, hundreds of photos takes on the life of its population. How wide he is the emperor of the empire ii the territory of the people of blogging and colorful to demonstrate that I was going to create a panorama.

in our daily lives take the path of a long development photography: digital photography of modern daguerreotip XIX of the xxi century a century ago. Print on photo paper from the technical departments will help to replikatsiya plates for single mass on the ribs, instead of millions from the study of the history of photography using digital technology to take photographs foyalanish only complex can. Photos of discoveries as a result, in various areas of science, produced new developing under the influence, chemistry, physics, optics, and can be considered as part of the history of science

and technology in recent decades. In the meantime, photography is used as a visual method in science starting from the second half of the nineteenth century. Photography has made discoveries in the field of astronomy, medicine, ethnography, geography, archeology, biology and others. Photography was active time-the court of the military has been taking photographs and pictures. He is associated with the formation of the economy of new occupations appear professional photography (photographer, Retoucher), specializing manufacturing and sales of businesses and shops. Photography was formed. The photos are not included in the overall tax system. Authorities also control the political situation changes in the monthly photography business, photography photos to ban the spread of political criminals, the representatives of the family to take pictures of objects and view photos of the king to take pictures of the pictures of the editing process to increase the cost of packing, photography contribute to the development. Photography such as the event appears to be. A new form of my favorite hobbies, everyday life can be considered in the context of history. Memory sharing photos, photo archive, the photographer won in the form of family visits, and photos hung portraits of the inner part of the house will change. Daguerrotiplar writing. Fine art photos of people from different social origin, as opposed to a mass difference of photography and is not available to photography with the changes helped the formation of many cities of the Russian empire in the last quarter of the nineteenth century when society was formed. XIX-the beginning of the twentieth century. Today there are photos of most of them in the recovery process themselves and society created at the end of the century. We know that the arrival of the relationship between art and works of art and photography as art in the first place led to the development of the route. The photograph is the result of creative work of person to admit that bring the issue of the necessity to figure out! photographer copyright protection. A comprehensive study of the history of social policy in the system and the cultural life of the region. Photography is currently in development that will allow you to contribute towards the development and expansion of this issue. The work of writing a series of photography activity of individual institutions and the coverage of the activities of the society evolved. Photography photographers photographic work considered only in the context of the development of photography you can learn. Butunrossiya. The English writer A. S. P. Vartanov Pollakning" the year of the Russian language published in 1983 in " history of photography " photography wrote only recently that the theory developed in the years after the war appear to live abroad in different countries at exactly the same time local schools evolved dedicated photographic books. In Russia of the first works on the history of photography will be published at the end of the nineteenth century, however, for centuries the "official photos" editor of the magazine "four of the name-the three period" in the game I would say: "...which is almost completely devoid of photographs about the history of Russian literature from the game. The history of the photographic-literature that requires you to this up-and we see the interest of the Russian society. Turganimizdek, absolutely not, however, at the end of the nineteenth century the first attempts appeared in the background in the analysis of statistical data on the basis of the activities of the threads in Russia. "About the photographic messenger" in the pages of author under home hidden letters - Lami V. Y., the year 1890 the population of St. Petersburg daily to get a list on the basis of the analysis of social, community unites young and tender on the photographic periodicals were published in a number of later works show without copyright. Written from suggestions put forward by taking the practical aspects of this research performs the photographic community. It must be acknowledged that large that we may Turkistan, Central Asia such changes carried out in the Russian empire, i.e. both will pass.

Conclusion. In general, in terms of researches has been coming into some serious photography by scientists. In particular, this opportunity also to spread knowledge of the local population Turkistan. Fotografik natejasida representatives before use tula bloody mubolag we say 'a toe made 'lamiz. The

initial reason the efforts of the local photographer'-with the movement are starting to little progress in the field of photography. Originally coming into turkistan this news to the local population is also a very heavy later in the night during the high representatives of research that is of interest to knowledge fotografik we can see.
