Key activities that managers perform to organize and manage their teams

Planning and goal-setting are crucial activities that managers perform to organize and manage their teams. During the planning stage, managers create a roadmap for achieving the organization's objectives and goals. They identify the resources required, the timelines, and the milestones that need to be achieved. Setting clear and specific goals is essential for the team to understand what they need to accomplish and how their work fits into the broader organizational strategy. Through effective planning and goal-setting, managers can ensure that their team's efforts are aligned with the company's objectives, and everyone is working towards a common goal.

Assigning tasks and delegating responsibilities is another critical activity that managers perform to organize and manage their teams. Managers need to allocate employee resources effectively, matching the right skills and experience with the tasks that need to be accomplished. Delegating tasks to team members not only helps managers to distribute the workload but also provides opportunities for employees to develop their skills and take on more responsibility. Effective delegation requires clear communication, setting expectations, and providing the necessary support to ensure that the work is completed to a high standard.

Monitoring progress and providing feedback are essential activities that managers perform to organize and manage their teams[4]. Managers need to keep track of their team's progress towards achieving the goals established in the planning stage[6]. By monitoring progress, managers can identify potential issues early on and take corrective action to keep the team on track. Providing feedback to employees on their performance is critical for their development and growth. Managers need to provide constructive feedback that is specific, timely, and actionable. By doing so, managers

can help employees to improve their performance and achieve their goals, contributing to the overall success of the team and the organization.
